

Capture the Moment.

ENGINEERED FOR INSTANT COMFORT

New ways of working are leading us to agile environments that promote collaboration, creativity and productivity. Flexibility helps build self-empowerment – especially when it comes to where you work. That's why we designed Activity: to maximise adaptability and minimise fuss, making space for what matters in the here and now – those precious moments that make each day special.

Designed by the Herman Miller Asia Pacific R&D team, Activity features a weight-sensitive mechanism that responds to the body automatically, delivering comfort in an instant.

LET'S GET ACTIVE

Mobility first: designed to encourage movement, Activity features Activeback[™], a lightweight backrest with enhanced back support. Made from MPA (Modified Polyamide), Activeback[™] varies in thickness from top to bottom and from the centre to the outer edges, providing flexibility and support where your bodies needs it most. Its tapered edges provide a visual contour, giving Activity its sleek, clean-lined look.

Activeback[™] backrest

Width adjustable armrest

ACTIVE ARM SUPPORT

Activity truly embodies its name; even its arms are made for motion. They move in four directions, facilitating adjustments to height, angle, depth and width. The armrests have also been specially engineered, enabling them to flip 360 degrees.

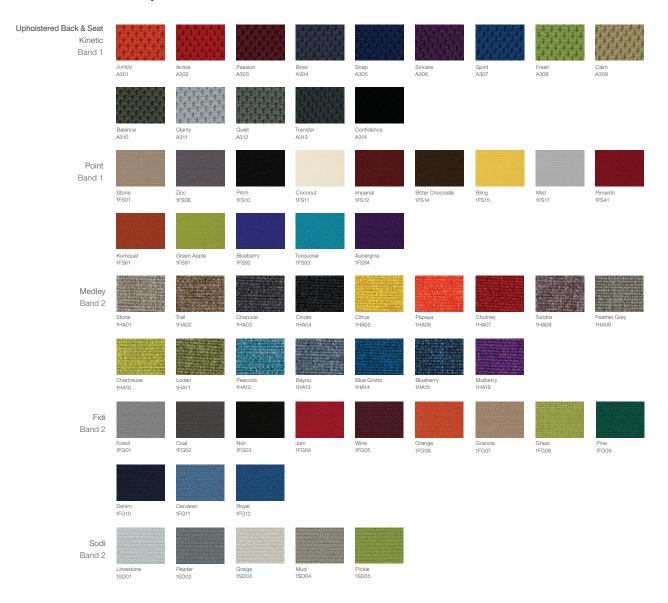

FIT FOR YOU

It's always about choice with Activity. Choose how far to recline with a travel limiter that locks the chair's tilt angle to 20 degrees; or choose a four-position lock that stops the backrest at four different angles. The seat also adjusts for a perfect fit: simply push the button on the underside of the seat, and then slide backwards and forwards to find that sweet spot.

MAKE IT PERSONAL

Customise Activity by choosing from a wide variety of textiles. With a discreet look and feel, Activity is perfectly placed to fit in any environment.
