

FIBER ARMCHAIR – SLED BASE

ISKOS-BERLIN ON THE DESIGN “One of the most difficult and noble disciplines is to design without eccentricity, creating simple, well-functioning and almost ordinary objects that nevertheless have strong identities. We designed Fiber Armchair to do just that through a clear sculptural language that refuses to compromise on comfort. It’s a chair stripped of all unnecessary layers. The iconic form marries soft, embracing curves with an innovative wood fiber composite, giving Fiber Armchair a unique expression and tactile texture.”

DESCRIPTION

The Fiber Armchair is made from an innovative wood fiber composite with up to 25% wood fibers for a tactile expression and matte touch, joined by the Scandinavian touch of a sled base. The fibers make for a unique texture when viewed up-close yet become invisible to the eye when viewed from afar, paired with an embracing yet minimal shape.

PRODUCTION PROCESS

The wood and plastic composition is heated and poured into a mold that presses the chair’s shell. The steel sled base is CNC-bent and powder coated.

MATERIAL

Shell consists of a wood and plastic composition with up to 25% wood fibers, 70% PP (polypropylene) and 5% coloured PP. Sled base is made from powder coated steel.

Full upholstery and front upholstery versions w. textiles from Kvadrat and in Leather from selected premium leather suppliers are available upon request.
